

New Jersey's Telephone Consumer Protection Act is one that should be the leader for the country. We should have the right to choose who we contact. Whether we have done business with someone before doesn't mean we want to continue contact with them. This should be our choice. I find it very upsetting that the telephone service we pay for as consumers, whether home or mobile, can be used to harrass us. Please keep this in mind and protect the people, not the telemarketers. Thank you.
